The Haunted Lighthouse Limited
Forgejo Hosting & GitOps Platform
Technical Briefing - v1.0

1. Overview

Forgejo is a lightweight, privacy-focused Git platform ideal for teams needing reliable source control
without reliance on large cloud providers. The Haunted Lighthouse Limited delivers a fully managed
Forgejo service hosted on EU infrastructure with strong security and backup guarantees.

2. Who This Service Is For

- SMEs, freelancers, developer teams
- Organisations requiring private Git repos
- GDPR- aligned projects needing EU hosting
- Clients wanting independence from GitHub/GitLab

3. What The Haunted Lighthouse Limited Provides

Deployment:
- Forgejo instance with SSH + HTTPS access
- Private repositories with granular permissions
- Optional CI runner integration
- TLS via Caddy, custom domains

Operations:
- Continuous monitoring
- Nightly encrypted database + repo backups
- Controlled upgrades
- Log and audit retention

Support:
- User onboarding
- Repo migration assistance
- Admin guidance

4. Technical Approach

- Rootless Docker deployment with hardened config
- EU-based hosting (HEL1)
- No Cloudflare or external CDNs
- Encrypted backups (local + off- site)
- Firewalled access with SSH on custom ports
- Optional MinIO storage for LFS

5. Security & Compliance

- GDPR- aligned EEA hosting
- TLS enforced
- Encrypted repo + DB backups
- Optional TOTP/WebAuthn for users

6. Support & Maintenance

- Scheduled maintenance updates
- Break- fix support
- Migration from GitHub/GitLab
- Optional monthly health summaries

7. Pricing Structure (High- Level)

- Setup fee (deployment + migration)
- Monthly operations
- Optional CI runners or storage add- ons
