The Haunted Lighthouse Limited
Consultancy Services Overview
v1.0

1. Overview

The Haunted Lighthouse Limited provides specialised technical consultancy for organisations seeking
stable, privacy- respecting, and self- hosted digital infrastructure. We focus on practical engineering, clear
guidance, and reliable long- term operation.

2. Core Areas of Expertise

- Self- hosted platforms (Mastodon, Forgejo, MinIO)
- GDPR- aligned infrastructure planning
- Backup and disaster recovery design
- Secure deployment workflows
- Bare- metal and containerised hosting
- Observability, monitoring, and health auditing

3. Consultancy Engagement Model

We operate with a structured yet flexible approach:

Initial Assessment:
Understanding goals, existing systems, compliance needs, and constraints.

Technical Recommendations:
Clear, actionable options - not theory or vague suggestions.

Hands- On Engineering:
Implementation support where needed: configuration, migration, integration, optimisation.

Operational Guidance:
Best practices for maintenance, upgrades, backups, and federation.

4. What Clients Can Expect

- A stable, production- ready infrastructure plan
- Clear documentation and predictable lifecycle processes
- Transparent communication and realistic timelines
- Minimal external dependence: EU- hosted, no CDN reliance
- Security- first recommendations tailored to your risk profile

5. Why Choose The Haunted Lighthouse Limited

Our consultancy is anchored on long- form operational experience: building, maintaining, and supporting
real services - not just advising from theory. We operate the same systems we help clients deploy, giving
our guidance practical grounding and proven reliability.

6. Engagement Options

- One- off consultation sessions
- Project- based engagements
- Ongoing retainers for hosted platforms
- Documentation, policy, and process development

7. Next Steps
