The Haunted Lighthouse Limited
Consultancy Services Overview
v2.0

1. Overview
The Haunted Lighthouse Limited provides technical consultancy for organisations that want stable, privacy respecting, and self hosted digital infrastructure. Our work focuses on practical engineering, clear guidance, and systems that can be operated reliably over the long term.

2. Core Areas of Expertise
- Self hosted platforms including Mastodon, Forgejo, and MinIO
- GDPR aligned infrastructure and data handling design
- Backup and disaster recovery planning
- Secure deployment and upgrade workflows
- Bare metal and containerised hosting environments
- Observability, monitoring, and operational health auditing

3. How Our Consultancy Works
We operate using a structured but flexible engagement model designed to reduce uncertainty and avoid unnecessary complexity.

Initial assessment
We begin by understanding your goals, existing systems, compliance requirements, and operational constraints.

Technical recommendations
We provide clear, actionable options rather than abstract theory or vendor driven suggestions.

Hands on engineering
Where required, we support implementation through configuration, migration, integration, and optimisation work.

Operational guidance
We advise on maintenance, upgrades, backups, federation management, and ongoing system health.

4. What Clients Can Expect
- A stable and production ready infrastructure plan
- Clear documentation and predictable lifecycle processes
- Transparent communication and realistic timelines
- Minimal external dependence with EU hosted systems and no CDN reliance
- Security first recommendations appropriate to your risk profile

5. Why Work With The Haunted Lighthouse Limited
Our consultancy is grounded in long term operational experience. We build, maintain, and support the same kinds of systems we help clients deploy. This ensures our guidance is practical, realistic, and informed by real world operation rather than theory alone.

6. Engagement Options
- One off consultation sessions
- Project based consultancy engagements
- Ongoing retainers for supported platforms
- Documentation, policy, and process development

7. Next Steps
To begin a conversation:
